CALL FOR PAPERS

Mobile and Ubiquitous Multimedia

Overview

Because multimedia is becoming ubiquitous, we will soon be able to count on access to any multimedia content, from anywhere in the world. This special issue addresses this development and looks at the current cutting-edge technologies enabling mobile and ubiquitous multimedia. We seek papers discussing novel and future-oriented research that focuses on the architectures, protocols, and algorithms developed to cope with mobility. We also seek papers on case studies, field trials, and evaluations of new applications and services; research in novel mobile user interfaces; and research in design and use of intelligent, aware, proactive, and attentive environments. Further, we invite papers presenting research on middleware and distributed-computing support for mobile and ubiquitous multimedia; mobile computer graphics, games, and entertainment; and mobile and ubiquitous multimedia in intelligent transport systems. Finally, we invite papers that discuss research on novel adaptive, context-aware, and wireless multimedia applications and systems, along with papers that cover mobile media management and mobile and ubiquitous multimedia in ad hoc networks. Overall, the special issue will outline the trends, major challenges, and perspectives related to mobile and ubiquitous multimedia.

Submission Procedures and Deadlines

Submit your paper at <https://mc.manuscriptcentral.com/cs-ieee>. When uploading your paper, please select the appropriate special issue title under the category "Manuscript Type." If you have any questions regarding the submission system, please contact Kristen Jarboe at mm-ma@computer.org. All submissions will undergo a blind peer review by at least two expert reviewers to ensure a high standard of quality. Referees will consider originality, significance, technical soundness, clarity of exposition, and relevance to the special issue topics.

To submit a paper to the April-June 2010 special issue, please observe the following deadlines:

- ✓ **15 June 2009:** Full paper, which must be submitted using our online manuscript submission service and prepared according to the instructions for authors (please see the Author Resources page at <http://www.computer.org/multimedia/author.htm>).
- ✓ **15 September 2009:** Authors notified of acceptance, rejection, or needed revisions.
- ✓ **15 October 2009:** Revisions due.
- ✓ **15 November 2009:** Notification of final acceptance
- ✓ **15 December 2009:** Final versions due.
